The Indian Civilization Committee is happy to report that their first trial dig in search of evidence of an Indian village or house site was a success. First of all, without the co-operation of many people, this could not have been done. To begin with, we want to thank the owner of the property, Mr. Pretlow Brinkley and Mr. and Mrs. Clyde Rawles, tenants on the property. On Saturday, March 9, 1968, members of the Historical Society met at Suffolk High School, leaving at approximately 10:00 A. M. They arrived at the site about 10:30 and immediately started digging and sifting. The first square produced small pieces of clay pottery (burned). In the second square a post mold was found. It measured approximately $4\frac{1}{2}$ inches in diameter. Three squares were opened and carefully screened down to 15 inches. A crude scraper was found at the bottom of the post mold. A sample of the black earth from the post mold was kept in the event we find it advisable to have it tested. It is interesting to note that on such short notice there were so many people present for the dig.
